

University Advisory

We don't just get students into university. We engineer the path there.

98% university acceptance rate across our system of 15,000+ graduates. Admitted to MIT, Princeton, UC Berkeley, University of Sydney, NTU, CUHK, and 160+ universities worldwide.

The Five Pillars of University Placement

Getting into the right university is not an accident. It is the result of deliberate preparation across five interconnected pillars — each one built into your AGS journey from Day One.

01 — Academic Results

Subject selection strategy, AP course planning, GPA optimisation, and transcript management. We help you build a transcript that tells a compelling story.

02 — SAT / ACT Strategy

Test-optional university identification, decision frameworks, preparation referrals, and score strategy. Your accredited diploma already signals rigour.

03 — Activities & Profile

Extracurricular planning from Grade 9, leadership strategy, research opportunities, competition guidance, and sport/arts integration.

04 — Essays & Application

Personal statement coaching, supplemental essays, CommonApp/UCAS guidance, deadline management, and interview preparation.

05 — TOEFL / IELTS Proficiency

Many universities waive English proficiency tests for AGS graduates. For those who need a score, we help you prepare strategically.

Why AGS Advisory Is Different

- **We control the inputs:** Most advisors work with whatever transcript a student arrives with. AGS advisors helped build it — because we are also your school.
- **160+ universities, 10 years of data:** We know which universities love AGS graduates, which ones waive TOEFL, and which APs make the difference.
- **From Grade 6 to acceptance letter:** University advisory starts when your child enrolls, not when they panic in Grade 12.

Advisory Services

Included with AGS Enrolment

No additional fee. University advisory is woven into your AGS journey from Day One. Profile planning, essay coaching, and application guidance are part of what we do.

Standalone Advisory

From USD 2,000. For students not enrolled at AGS who want expert guidance across all five pillars. Subject to availability.

Our Founding Story

Pamela Lim's second daughter entered university at 15 and started her PhD at 19. Her youngest entered at 13 and graduated with high distinction in computer science. Five children, five universities, ages 11 to 15 — not by accident, by design.

That deliberate approach to university placement is now built into every AGS student's journey.
